this product.

BRICKFORM Pro-Dye penetrates the surface of concrete and cementitious overlays, creating a layer of translucent color that dries quickly and will not chip, crack, or peel. Pro-Dye is designed to work with the *Professional Concrete Polishing System* for the coloring process in polishing floors. Pro-Dye is also excellent in vertical applications, stencils, and logos because it dries so quickly. Pro-Dye colors are vivid with unique multi-colored intensities, similar to the mottling effect of acid stain. Colors can be combined to create an unlimited number of color variations.

Pro-Dye Standard Colors

Swatches shown here represent Pro-Dye applied to white Micro-Topping (left) and gray concrete (right).

Disclaimer - When choosing colors, use the appropriate BRICKFORM color selection guide for more accurate matching. Colors shown here display only the range of BRICKFORM options available. To confirm an exact color, have your contractor prepare a color sample for your approval before actual construction. BRICKFORM accepts no responsibility for color matching or misprints.
